# Aspire Europe: Course Conductor Accredited Market Leader for Project & Programme Management Training

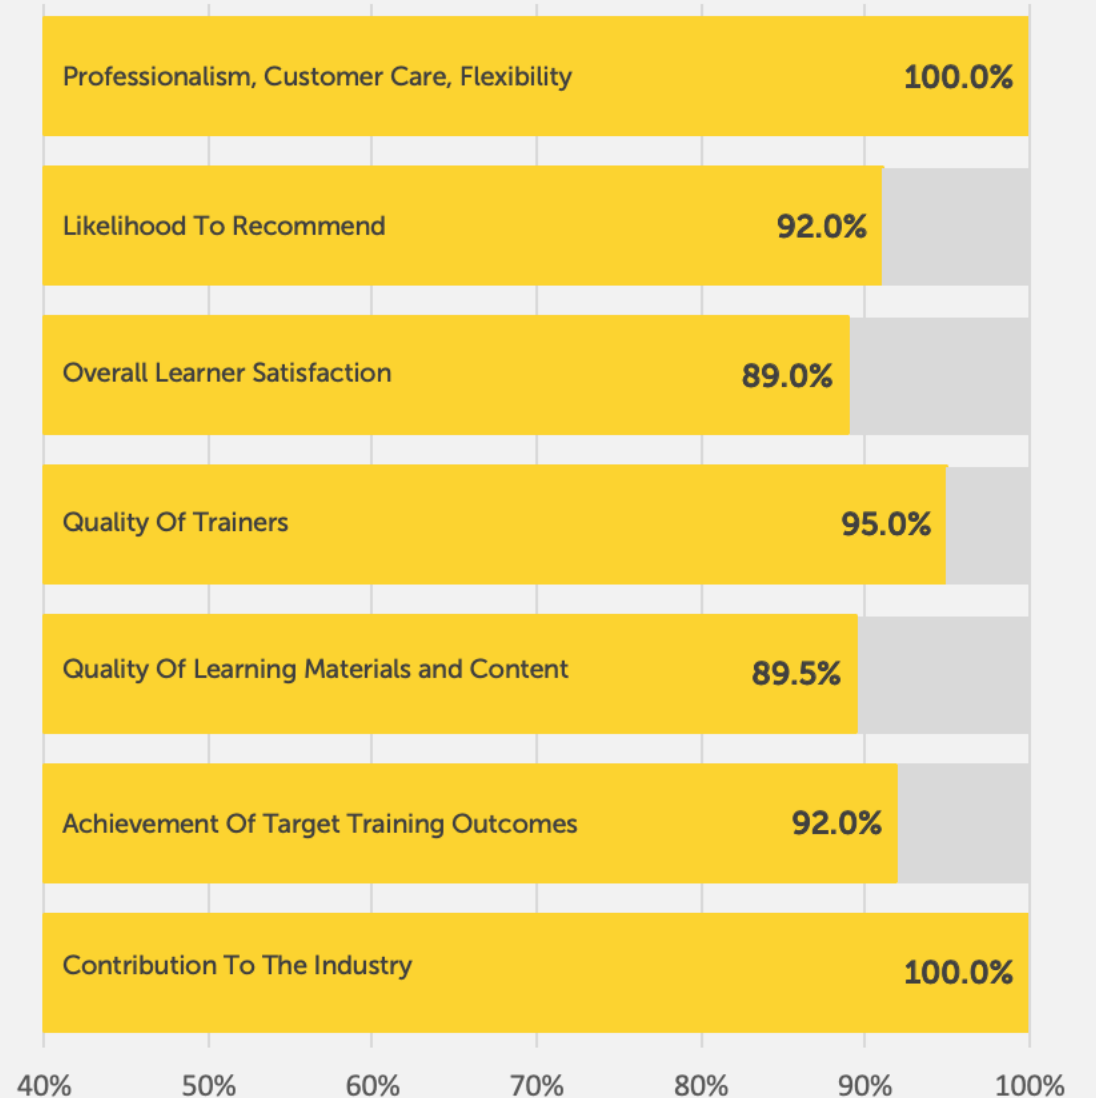

Aspire Europe is based in the United Kingdom. Aspire Europe provides training and consulting services across project, programme, portfolio and PMO management related disciplines. The director is the author of Managing Successful Programmes (MSP®), the worlds most widely adopted programme management standard.

Multiple corporate clients in both public and private organisations identified that the Aspire Europe training had direct positive impact on a variety of business aspects. These included the speed and quality of programme initiation, the quality of programme planning, dependency management, communication and stakeholder engagement. Customer also highlighted that the overall professionalism and customer care was excellent.

In addition to corporate client feedback, Course Conductor analyzed 839 course evaluations from Learners that attended Aspire Europe courses. Learners provided excellent feedback, with specific focus on the skills, personable approach and experience of the trainers. Many Learners identified that the trainer's ability to make the learning content applicable to their own working environment was crucial not only to enhancing their skills, but successfully embedding the learning into their day to day work with immediate value being realised.

Aspire Europe is a Course Conductor Accredited Market Leader for Project & Programme Management (Certification Number CCMLAI1911).

## Aspire Europe Customer Feedback Analytics

## Aspire Europe Corporate Customer Feedback Gathered Independently by Course Conductor.

“ *Planning, risk management, dependency management all improved as did engagement of stakeholders and communication of the change...but most importantly budgets were reduced and culture changed.*

Industry: Local Government

“ *We experienced increased communication due to the use of a common language.*

Industry: Infrastructure

“ *Improved understanding of roles and responsibilities with increased use of standard templates and common language.*

Industry: Local Government

“ *Programme definition and project initiation improved.*

Industry: Central Government
